KEY WORD INDEX

- Aggregation, 141
- Algorithm, 71
- Bayesian allocation rule, 31
- Bayesian diagnostics, 179
- Body burdens of lead, 179
- Boolean model, 31
- Branching processes, 193
- B-splines, 1
- Budgeted expenditure, 131
- Clustering, 83, 141
- Cobb-Douglas production function, 131
- Comparison of methods, 169
- Complete order, 141
- Complete preorder, 141
- Condorcet criterion, 141
- Cross-national survey, 43
- Curve-fitting, 99
- Data aggregation, 83
- Data analysis, 13
- δ -method, 99
- Discrete data, 31
- Discretization, 1
- Discriminant analysis, 169
- Dissimilarity index, 43
- Double-exponential gamma function, 131
- Economic development, 83
- Efficient investment models, 71
- Endocrinology, 31
- Factor rotation, 121
- Finance, 71
- Flow time, 61
- Functional equivalence in survey research, 43
- Group technology, 153
- Harmonic approximation, 131
- Hayashi's correspondence analysis, 43
- Hierarchical and non-hierarchical clustering, 153
- Hierarchical classification, 13
- Human blood pressure, 179
- Language, 43
- Large-sample theory, 99
- Majorization, 61
- Makespan, 61
- Markov chains, 193
- Maximum likelihood multidimensional scaling, 209
- Measurement error intolerances, 179
- Medical data, 13
- MEFV curve, 1
- Multivariate estimation, 99
- Neurology, 13
- Non-linear transformations, 1
- Observational errors, 31
- Optimal stopping times, 193
- Paired comparisons preference data, 209
- PCA, 1
- Planning, 83
- Population-sample decomposition, 99
- Probabilistic unfolding via random ideal points, 209
- Probabilistic vector model, 209
- Production management, 153
- Qualitative ordinal data, 13
- Redundancy analysis, 121
- Response category, 43
- Simulation, 169
- Specification uncertainties, 179
- Stochastic dominance, 71
- Stochastic production frontier, 131
- Stochastic scheduling, 61
- Stopped Markov chains, 193
- Validation and significance, 13
- Variability ordering, 61

Applied Stochastic Models and Data Analysis

Contents

VOLUME 2 NUMBERS 1-4 1986

NUMBER 1 AND 2

Biometrics, medicine and health care

- W. VAN PELT AND J. VAN RIJCKEVORSEL
Non-linear Principal Component Analysis of Maximum Expiratory Flow-Volume Curves 1

Biometrics, medicine and health care: Data aggregation

- I. C. LERMAN
Classification of Medullary Lesions Among Paraplegic Patients by the Likelihood of the Links Method 13

Biology, biomedicine and health care

- S. THIRY AND A. BOUCKAERT
A Statistical Approach to Logical Inference in Endocrine Physiopathology 31

Natural language processing

- Y. KURODA, C. HAYASHI AND T. SUZUKI
The Role of Language in Cross-national Surveys: American and Japanese Respondents 43

Production, scheduling, routing and inventory: Queuing

- M. PINEDO AND S.-H. WIE
Inequalities for Stochastic Flow Shops and Job Shops 61

Insurance, economics and finance

- B. P. HELMS, W. H. JEAN AND H. TEHRANIAN
An Algorithm for *NTH* Degree Stochastic Dominance 71

Data aggregation, Clustering and classification: Insurance, economics and finance

- J. W. OWSIŃSKI AND S. ZADROŃNY
Structuring a Regional Problem: Aggregation and Clustering in Orderings 83

- Letter to the Editor 97

NUMBER 3

Insurance, economics and finance: Statistical validation

- B. M. S. VAN PRAAG, J. DE LEEUW AND T. KLOEK
The Population-sample Decomposition Approach to Multivariate Estimation Methods 99

Factor analysis

- A. Z. ISRAËLS
Interpretation of Redundancy Analysis: Rotated vs. Unrotated Solutions 121

Insurance, economics and finance: Production, scheduling, routing and inventory	
S. S. HAMLEN AND W. A. HAMLEN, JR. The Estimation of Stochastic Cost-quantity Frontiers for Discretionary Cost and Budgeted-expenditure Systems	131
Data aggregation: Insurance, economics and finance; Clustering and classification	
P. MICHAUD Rankings Aggregation in Regional Planning	141
Production, scheduling, routing and inventory: Clustering and classification	
I.-C. LERMAN Group Methodology in Production Management: a Solution Based on a Hierarchical Classification Method	153
Announcements	167

NUMBER 4

Clustering and classification: Statistical validation	
D. DEFAYS AND C. HEUCHENNE A Comparison of Three Linear Rules for Classification	169
Biometrics, medicine and health care	
S. E. ATKINSON, T. D. CROCKER AND D. H. WILLIAMS An Application of Some Bayesian Diagnostics to a Study of the Impact of Blood Lead upon Human Blood Pressure	179
Decision and control: New applicable models	
M. ABDEL-HAMEED Identities for Stopped Markov Chains and their Applications	193
Data aggregation	
I. BÖCKENHOLT AND W. GAUL Analysis of Choice Behaviour via Probabilistic Ideal Point and Vector Models	209
Book Reviews	227
Author Index	229
Key Word Index	230
